February 20, 2014

Raptivity Completes HTML5 Support for All Its Interaction Models

Harbinger Knowledge Products, a global leader in interactivity solutions today announced HTML5 publishing support for its entire library of 145+ interaction models, popularly known as the 'Raptivity Suite'. The announcement marks a strategic milestone for Raptivity in the fast growing HTML5 devices and mLearning market.

There is an increased use of smart phones and tablets in eLearning and the HTML5 standard is rapidly being adopted and supported on various web browsers and mobile devices that don't support Flash, such as iPhones and iPads. Harbinger was one of the first eLearning product companies in 2010 to embrace the shift to HTML5 with its HTML5 TurboPack. Considering the industry's significant interest, Raptivity had announced in 2013 that it would provide HTML5 support for its entire library of interaction models. And with today's announcement, Raptivity has delivered on its commitment.

"This is a significant milestone for Raptivity. This release makes Raptivity the world's most extensive library of HTML5 compliant interaction models. It is a proud moment for us. This was a huge undertaking and we couldn't have done it without the unwavering support of our customers who provided us with valuable inputs and encouragement throughout this process", said Seema Chaudhary, President of Harbinger Knowledge Products.

With a new user interface, a simplified offering and a flexible pricing model, Raptivity has become an even more valuable tool for eLearning professionals. Besides the HTML5 compliance, Raptivity also provided support for Actionscript 3.0 for seamless integration with other eLearning tools in the market.
